SUBJECT INDEX*

A

Abdominal aortic surgery

Combined cardiac and abdominal aortic surgery, II-18

Adolescents

The relationship of white cell count, platelet count, and hematocrit to cigarette smoking in adolescents: the Oslo Youth Study, 971

Afterdepolarizations

Cesium chloride-induced long QT syndrome: demonstration of afterdepolarizations and triggered activity in vivo, 1092

Allograft rejection

Early detection of cardiac allograft rejection with proton nuclear magnetic resonance, II-231

α -Adrenergic receptors

Cyclic blood flow variations induced by platelet-activating factor in stenosed canine coronary arteries despite inhibition of thromboxane synthetase, serotonin receptors, and α -adrenergic receptors, 397

Amiodarone

Amiodarone and its desethyl metabolite: tissue distribution and morphologic changes during long-term therapy, 1064

Kinetics of electrophysiologic changes during oral loading of amiodarone and after withdrawal of amiodarone in the unsedated dog, 1380

Amitriptyline

Frequency-dependent effects of amitriptyline on ventricular conduction and cardiac rhythm in dogs, 898

Aneurysm

Left ventricular aneurysm and the prediction of left ventricular enlargement studied by two-dimensional echocardiography: quantitative assessment of aneurysm size in relation to clinical course, 280

Angina

The 5 year effect of bypass surgery on relief of angina and exercise performance, V-79

Indications for coronary artery bypass surgery in patients with chronic angina pectoris: implications of the multicenter randomized trials, V-23

Stable angina as a manifestation of ischemic heart disease: medical management, V-145

Unstable angina: status of aspirin and other forms of therapy, V-155

Angioplasty

Comparative long-term effects of coronary artery bypass graft surgery and percutaneous transluminal coronary angioplasty on regional coronary flow reserve, 833

Coronary angioplasty of multiple vessels: short-term outcome and long-term results, 1314

The effects of coronary angioplasty and reperfusion on distribution of myocardial flow, 334

Factors contributing to perforations from laser coronary angioplasty: observations in an intact human postmortem preparation of intraoperative laser coronary angioplasty, II-191

In-hospital morbidity and mortality in patients undergoing elective coronary angioplasty, 1044

Indications for transluminal coronary angioplasty, V-166

Influence of intimal dissection on restenosis after successful coronary angioplasty, 530

Percutaneous transluminal coronary angioplasty: a surgeon's view, 1144

Percutaneous transluminal coronary angioplasty: role in the treatment of coronary artery disease, V-161

Usefulness of coronary artery bypass graft surgery or percutaneous transluminal coronary angioplasty after thrombolytic therapy, V-39

Animal preparations

Animal preparations relevant for study with positron-emission tomography or nuclear magnetic resonance, IV-139

Requirements for animal preparations for metabolic imaging, IV-134

Anorexia nervosa

Effects of reduced left ventricular mass on chamber architecture, load, and function: a study of anorexia nervosa, 991

Aortic disease

Altered left ventricular mechanics in patients with valvular aortic stenosis and coarctation of the aorta: effects on systolic performance and late outcome, 515

Aortic dissection

Acute and chronic aortic dissections—determinants of long-term outcome for operative survivors, II-22

Aortic elasticity

Regional wave travel and reflections along the human aorta: a study with six simultaneous micromanometric pressures, 1257

Aortic regurgitation

Assessment and follow-up of patients with aortic regurgitation by an updated Doppler echocardiographic measurement of the regurgitant fraction in the aortic arch, 819

Importance of internal controls, statistical methods, and side effects in short-term trials of vasodilators: a study of hydralazine kinetics in patients with aortic regurgitation, 865

A new approach to noninvasive evaluation of aortic regurgitant fraction by two-dimensional Doppler echocardiography, 523

Survival and functional results after valve replacement for aortic regurgitation from 1976 to 1983: impact of preoperative left ventricular function, 1244

Aortic stenosis

Noninvasive estimation of valve area in patients with aortic stenosis by Doppler ultrasound and two-dimensional echocardiography, 810

Arrhythmia

Abnormal signal-averaged electrocardiograms in patients with nonischemic congestive cardiomyopathy: relationship to sustained ventricular tachyarrhythmias, 1308

Amiodarone and its desethyl metabolite: tissue distribution and morphologic changes during long-term therapy, 1064

Atrial fibrillation in patients with Wolff-Parkinson-White syndrome: incidence after surgical ablation of the accessory pathway, 161

Atrial flutter: a synthesis of concepts, 249

Autonomic control of ventricular tachycardia: sympathetic neural influence on spontaneous tachycardia 24 hours after coronary occlusion, 933

Catheter-mediated electrical ablation of the posterior septum via the coronary sinus: electrophysiologic and histologic observations in dogs, 612

Clinical correlates of atrial tachyarrhythmias after valve replacement for aortic stenosis, II-159

Comparative efficacy of transvenous cardioversion and pacing in patients with sustained ventricular tachycardia: a prospective, randomized, crossover study, 153

Complex ventricular arrhythmias in Q wave and non-Q wave myocardial infarction, 963

Computer detection of atrioventricular dissociation from surface electrocardiograms during wide QRS complex tachycardias, 1028

A consideration of antiarrhythmic therapy, 949

Day-to-day variations in inducibility of ventricular tachyarrhythmias during the late postmyocardial infarction phase in conscious dogs, 200

Dispersion of ventricular repolarization and arrhythmia: study of two consecutive ventricular premature complexes, 370

Does the type of venous drainage or cardioplegia affect postoperative conduction and atrial arrhythmias? II-259

The effects of premature stimulation of the His bundle on epicardial activation and body surface late potentials in dogs susceptible to sustained ventricular tachyarrhythmias, 214

Electrophysiologic and antiarrhythmic effects of sotalol in patients with life-threatening ventricular tachyarrhythmias, 555

Frequency-dependent effects of amitriptyline on ventricular conduction and cardiac rhythm in dogs, 898

Programmed electrical stimulation of the heart in patients with life-threatening ventricular arrhythmias: What is the significance of induced arrhythmias and what is the correct stimulation protocol? I

Arteriosclerosis

Experimental arteriosclerosis treated by argon ion and neodymium-YAG laser endarterectomy, II-200

Some reflections on arteriosclerosis: past, present, and future. Presidential Address, 8

Aspirin

Unstable angina: status of aspirin and other forms of therapy, V-155

*Roman numbers indicate articles published in supplements.

Warfarin versus dipyridamole-aspirin and pentoxifylline-aspirin for the prevention of prosthetic heart valve thromboembolism: a prospective randomized clinical trial, 1059

Atenolol

Effect of the combination of diltiazem and atenolol on exercise-induced regional myocardial ischemia in conscious dogs, 233

Atherosclerosis

Angle dependence of ultrasonic backscatter in arterial tissues: a study in vitro, 572

Atherogenic lipoproteins and coronary artery disease: concepts derived from recent advances in cellular and molecular biology, 943

Atherosclerosis, calcium, and calcium antagonists, 456

Cholesterol and cardiovascular disease: no longer whether, but rather when, in whom, and how? 686

Comparison of pathologic and angiographic findings in a porcine preparation of coronary atherosclerosis, 1081

Noninvasively diagnosed peripheral arterial disease as a predictor of mortality: results from a prospective study, 768

ATPase

Magnetization transfer measurements of creatine kinase and ATPase rates in intact hearts, IV-94

Atrial fibrillation

Atrial fibrillation in patients with Wolff-Parkinson-White syndrome: incidence after surgical ablation of the accessory pathway, 161

Atrial flutter

Atrial flutter: a synthesis of concepts, 249

Atrial natriuretic peptide

Effects of synthetic atrial natriuretic peptide on renal function and renin release in acute experimental heart failure, 892

Atrioventricular node conduction

Frequency-dependent effects of verapamil on atrioventricular nodal conduction in man, 344

B

β -Adrenergic receptors

The interaction of verapamil and norverapamil with β -adrenergic receptors, 547

β -Blockers

Effect of β -adrenergic blockers on the peripheral circulation in patients with peripheral vascular disease, 1226

Effect of the combination of diltiazem and atenolol on exercise-induced regional myocardial ischemia in conscious dogs, 233

Effects of β -adrenoreceptor-blocking drugs in patients with Raynaud's phenomenon, 466

Use of an ultra short-acting β -blocker in patients with acute myocardial ischemia, 873

Blalock-Taussig shunt

Classic versus modified Blalock-Taussig shunts in neonates and infants, II-35

Blood flow

The accuracy of Doppler ultrasound measurement of pressure gradients across irregular, dual, and tunnel-like obstructions to blood flow, 577

Contrast echocardiographic estimation of regional myocardial blood flow after acute coronary occlusion, 1115

Cyclic blood flow variations induced by platelet-activating factor in stenosed canine coronary arteries despite inhibition of thromboxane synthetase, serotonin receptors, and α -adrenergic receptors, 397

Effect of the sympathetic nervous system on limb circulation and metabolism during exercise in patients with heart failure, 72

Effects of blood flow on the positron-emission tomographic determination of substrate transport rates, IV-72

The effects of coronary angioplasty and reperfusion on distribution of myocardial flow, 334

Error in parameter estimates with variations in flow: measurement of oxygen utilization with positron-emission tomography, IV-77

Exercise thallium-201 scintigraphy in dogs: effects of long-term coronary occlusion and collateral development on early and late scintigraphic images, 881

Factors that modify the flow response to intracoronary injections, 287

The radiographic assessment of coronary blood flow parameters, 460

Transluminal, subselective measurement of coronary artery blood flow velocity and vasodilator reserve in man, 82

Blood pressure

The nature of opioid involvement in the hemodynamic, respiratory, and humoral responses to exercise, 982

Body surface mapping

Detection of local abnormalities in ventricular activation sequence by body surface isochrone mapping in patients with previous myocardial infarction, 801

C

Calcium antagonists

Atherosclerosis, calcium, and calcium antagonists, 456

Frequency-dependent effects of verapamil on atrioventricular nodal conduction in man, 344

Captopril

Survival after an experimental myocardial infarction: beneficial effects of long-term therapy with captopril, 406

Systemic and regional hemodynamic effects of captopril and milrinone administered alone and concomitantly in patients with heart failure, 364

Carbohydrates

Carbohydrate interconversions and energy production, IV-1

Cardiac catheterization

Accuracy of volume measurement by conductance catheter in isolated, ejecting canine hearts, 440

Cardiac metabolism

Overview of the process of delivery: flow, transmembrane transport, reaction, and retention, IV-39

Cardiac surgery

Combined cardiac and abdominal aortic surgery, II-18

Hemodynamic effects of intravenous nitroglycerin in pediatric patients after heart surgery, II-101

Cardiac tamponade

Effects of intravascular volume state on the value of pulsus paradoxus and right ventricular diastolic collapse in predicting cardiac tamponade, 1076

Cardiac transplantation

Early detection of cardiac allograft rejection with proton nuclear magnetic resonance, II-231

A prospective randomized trial of pretransfusion/azathioprine/prednisone versus cyclosporine/prednisone immunosuppression in cardiac transplant recipients: preliminary results, II-227

Reduced infection in cardiac transplant recipients, II-237

The role of mechanical support and transplantation in treatment of patients with end-stage cardiomyopathy, II-7

Cardiogenic shock

Long-term follow-up of postcardiotomy patients with profound cardiogenic shock treated with ventricular assist devices, II-216

Cardiomyopathy

Abnormal signal-averaged electrocardiograms in patients with nonischemic congestive cardiomyopathy: relationship to sustained ventricular tachyarrhythmias, 1308

Diastolic abnormalities in patients with hypertrophic cardiomyopathy: relation to magnitude of left ventricular hypertrophy, 310

Effects of sublingual nifedipine on hemodynamics and systolic and diastolic function in patients with hypertrophic cardiomyopathy, 1001

Has 'obstruction' hindered our understanding of hypertrophic cardiomyopathy? 1148

Improvement in symptoms and exercise tolerance by metoprolol in patients with dilated cardiomyopathy: a double-blind, randomized, placebo-controlled trial, 536

Mildly dilated congestive cardiomyopathy, 302

The role of mechanical support and transplantation in treatment of patients with end-stage cardiomyopathy, II-7

Cardioplegia

Does the type of venous drainage or cardioplegia affect postoperative conduction and atrial arrhythmias? II-259

Myocardial recovery after hypothermic arrest: a comparison of oxy-

- generated crystalloid to blood cardioplegia. The role of calcium, II-241
- Cardioversion**
Comparative efficacy of transvenous cardioversion and pacing in patients with sustained ventricular tachycardia: a prospective, randomized, crossover study, 153
- Catecholamines**
Participation of endogenous catecholamines in the regulation of left ventricular mass in progeny of hypertensive parents, 38
- Catheter ablation**
Catheter-mediated electrical ablation of the posterior septum via the coronary sinus: electrophysiologic and histologic observations in dogs, 612
- Cesium chloride**
Cesium chloride-induced long QT syndrome: demonstration of afterdepolarizations and triggered activity in vivo, 1092
- Cholesterol**
Atherogenic lipoproteins and coronary artery disease: concepts derived from recent advances in cellular and molecular biology, 943
Cholesterol and cardiovascular disease: no longer whether, but rather when, in whom, and how? 686
The ratio of plasma high-density lipoprotein cholesterol to total and low-density lipoprotein cholesterol: age-related changes and race and sex differences in selected North American populations. The Lipid Research Clinics Program Prevalence Study, 93
- Cineventriculography**
Validation of attenuation-corrected equilibrium radionuclide angiographic determinations of right ventricular volume: comparison with cast-validated biplane cineventriculography, 317
- Clinical trials**
Some unexpected lessons from large multicenter randomized clinical trials, 449
- Coarctation**
Altered left ventricular mechanics in patients with valvular aortic stenosis and coarctation of the aorta: effects on systolic performance and late outcome, 515
- Collateral vessels**
Collateral conductance changes during a brief coronary occlusion in awake dogs, 225
- Computed tomography**
Determination of left ventricular mass in dogs with rapid-acquisition cardiac computed tomographic scanning, 1355
- Conductance**
Collateral conductance changes during a brief coronary occlusion in awake dogs, 225
- Congenital heart**
Abnormal distribution of pulmonary blood flow after the Glenn shunt or Fontan procedure: risk of development of arteriovenous fistulae, 471
Fetal atrioventricular valve insufficiency associated with nonimmune hydrops: a two-dimensional echocardiographic and pulsed Doppler ultrasound study, 825
Hemodynamic effects of intravenous nitroglycerin in pediatric patients after heart surgery, II-101
Right heart assist by intermittent abdominal compression after surgery for congenital heart disease, II-97
Significance of cardiac defects in the developing fetus: a study of spontaneous abortuses, 1232
- Congestive heart failure**
Characteristics of vascular hydraulic load in patients with heart failure, 61
Comparative systemic and renal effects of dopamine and angiotensin-converting enzyme inhibition with enalaprilat in patients with heart failure, 846
Effect of the sympathetic nervous system on limb circulation and metabolism during exercise in patients with heart failure, 72
The effects of sublingually administered nitroglycerin on forearm vascular resistance in patients with heart failure and in normal subjects, 747
Isometric exercise in patients with chronic advanced heart failure: hemodynamic and neurohumoral evaluation, 975
Mildly dilated congestive cardiomyopathy, 302
The pressure-flow response of the pulmonary circulation in patients with heart failure and pulmonary vascular disease, 1270
- Sudden unexpected death in patients with congestive heart failure: a second frontier, 681
Systemic and regional hemodynamic effects of captopril and milrinone administered alone and concomitantly in patients with heart failure, 364
- Contractility**
The dependence of myocardial ultrasonic integrated backscatter on contractile performance, 183
- Coronary angiography**
Comparison of pathologic and angiographic findings in a porcine preparation of coronary atherosclerosis, 1081
- Coronary arteriography**
The radiographic assessment of coronary blood flow parameters, 460
Selection of patients for coronary arteriography, V-3
- Coronary artery disease**
Fibrin formation and platelet aggregation in patients with severe coronary artery disease: relationship with the degree of myocardial ischemia, 27
Improvement in regional wall motion and left ventricular relaxation after administration of diltiazem in patients with coronary artery disease, 353

SUBJECT INDEX

- and the Veterans Administration Cooperative Trial, V-117
- Exercise testing in the Coronary Artery Surgery Study randomized population, V-31
- Long-term fate of bypass grafts: the Coronary Artery Surgery Study (CASS) and Montreal Heart Institute experiences, V-71
- Coronary occlusion**
 - Collateral conductance changes during a brief coronary occlusion in awake dogs, 225
- Coronary sinus**
 - An enzyme histochemical study of human sinus node, coronary sinus, and mitral valve muscle, 205
- Creatine kinase**
 - Magnetization transfer measurements of creatine kinase and ATPase rates in intact hearts, IV-94
- Cyclooxygenase**
 - The effect of cyclooxygenase inhibition on vasomotion of proximal coronary arteries with endothelial damage, 389
- Cyclosporine**
 - A prospective randomized trial of pretransfusion/azathioprine/prednisone versus cyclosporine/prednisone immunosuppression in cardiac transplant recipients: preliminary results, II-227

D

- Data analysis**
 - Ten precepts for quantitative data acquisition and analysis, IV-53
- Digital radiography**
 - The radiographic assessment of coronary blood flow parameters, 460
- Diltiazem**
 - Effect of the combination of diltiazem and atenolol on exercise-induced regional myocardial ischemia in conscious dogs, 233
 - Effects of propranolol and diltiazem alone and in combination on the recovery of left ventricular segmental function after temporary coronary occlusion and long-term reperfusion in conscious dogs, 413
 - Improvement in regional wall motion and left ventricular relaxation after administration of diltiazem in patients with coronary artery disease, 353
- Dobutamine**
 - Comparative effects of volume loading, dobutamine, and nitroprusside in patients with predominant right ventricular infarction, 1327
 - Treatment of canine permeability pulmonary edema: short-term effects of dobutamine, furosemide, and hydralazine, 1365
- Dopamine**
 - Comparative systemic and renal effects of dopamine and angiotensin-converting enzyme inhibition with enalaprilat in patients with heart failure, 846
- Dopamine receptors**
 - Dopamine receptors: applications in clinical cardiology, 245

E

- Ebstein's anomaly**
 - Surgical repair of Ebstein's anomaly: selection of patients and early and late operative results, II-70
- Echocardiography**
 - The accuracy of Doppler ultrasound measurement of pressure gradients across irregular, dual, and tunnel-like obstructions to blood flow, 577
 - Assessment and follow-up of patients with aortic regurgitation by an updated Doppler echocardiographic measurement of the regurgitant fraction in the aortic arch, 819
 - Contrast echocardiographic estimation of regional myocardial blood flow after acute coronary occlusion, 1115
 - Diastolic abnormalities in patients with hypertrophic cardiomyopathy: relation to magnitude of left ventricular hypertrophy, 310
 - A Doppler-two-dimensional echocardiographic method for quantitation of mitral regurgitation, 377
 - Fetal atrioventricular valve insufficiency associated with nonimmune

[Coronary Artery Surgery Study (CASS)—Electrophysiology]

- hydrops: a two-dimensional echocardiographic and pulsed Doppler ultrasound study, 825
- Intraoperative detection of myocardial ischemia in high-risk patients: electrocardiography vs two-dimensional transesophageal echocardiography, 1015
- Left ventricular aneurysm and the prediction of left ventricular enlargement studied by two-dimensional echocardiography: quantitative assessment of aneurysm size in relation to clinical course, 280
- A new approach to noninvasive evaluation of aortic regurgitant fraction by two-dimensional Doppler echocardiography, 523
- Non-Q wave perioperative myocardial infarction: assessment of the incidence and severity of regional dysfunction with quantitative two-dimensional echocardiography, 781
- Noninvasive estimation of valve area in patients with aortic stenosis by Doppler ultrasound and two-dimensional echocardiography, 810
- Prognostic significance and natural history of left ventricular thrombi in patients with acute anterior myocardial infarction: a two-dimensional echocardiographic study, 774
- Transluminal, subselective measurement of coronary artery blood flow velocity and vasodilator reserve in man, 82
- Editorials**

- Programmed ventricular stimulation in survivors of an acute myocardial infarction, 487
- Quantitative analysis of the high-frequency components of the signal-averaged QRS complex in patients with acute myocardial infarction: a prospective study, 105

Enalaprilat

- Comparative systemic and renal effects of dopamine and angiotensin-converting enzyme inhibition with enalaprilat in patients with heart failure, 846

Endocarditis

- Risk factors for the development of prosthetic valve endocarditis, 31
- Uptake of hematoporphyrin by valvular vegetations in experimental infective endocarditis, 1087

Endomyocardial fibrosis

- The surgical treatment of endomyocardial fibrosis: results in 55 patients, 11-274

Energy metabolism

- Cardiac energy metabolism: contributions from nuclear magnetic resonance, IV-18

Energy production

- Carbohydrate interconversions and energy production, IV-1

Epicardial activation

- The effects of premature stimulation of the His bundle on epicardial activation and body surface late potentials in dogs susceptible to sustained ventricular tachyarrhythmias, 214

Esmolol

- Use of an ultra short-acting β -blocker in patients with acute myocardial ischemia, 873

Exercise

- Effect of isotonic exercise training on left ventricular volume during upright exercise, 1237
- Effect of the sympathetic nervous system on limb circulation and metabolism during exercise in patients with heart failure, 72
- The 5 year effect of bypass surgery on relief of angina and exercise performance, V-79
- Isometric exercise in patients with chronic advanced heart failure: hemodynamic and neurohumoral evaluation, 975
- Left ventricular systolic and diastolic function in coronary artery disease: effects of revascularization on exercise-induced ischemia, 119
- Maintenance of exercise stroke volume during ventricular versus atrial synchronous pacing: rate of contractility, 1037
- The nature of opioid involvement in the hemodynamic, respiratory, and humoral responses to exercise, 982

Exercise testing

- Exercise testing in the Coronary Artery Surgery Study randomized population, V-31

F**Fatty acids**

- Fatty acid and ketone metabolism, IV-9

Fibrin

- Fibrin formation and platelet aggregation in patients with severe coronary artery disease: relationship with the degree of myocardial ischemia, 27

Fontan procedure

- Abnormal distribution of pulmonary blood flow after the Glenn shunt or Fontan procedure: risk of development of arteriovenous fistulae, 471
- Outcome of the Fontan procedure in patients with tricuspid atresia, II-88
- Relationship of pulmonary artery size to mortality in patients undergoing the Fontan operation, II-93

Fractionated electrograms

- Electrophysiologic and anatomic basis for fractionated electrograms recorded from healed myocardial infarcts, 596

Furosemide

- Treatment of canine permeability pulmonary edema: short-term effects of dobutamine, furosemide, and hydralazine, 1365

G**Glenn shunt**

- Abnormal distribution of pulmonary blood flow after the Glenn shunt or Fontan procedure: risk of development of arteriovenous fistulae, 471

Graft patency

- Improved graft patency in patients treated with platelet-inhibiting therapy after coronary bypass surgery, 138

H**Heart failure**

- Effects of synthetic atrial natriuretic peptide on renal function and renin release in acute experimental heart failure, 892

Heart rate

- Effect of heart rate on the canine end-systolic pressure-volume relationship, 654

Hematology

- The relationship of white cell count, platelet count, and hematocrit to cigarette smoking in adolescents: the Oslo Youth Study, 971

Hematoporphyrin

- Uptake of hematoporphyrin by valvular vegetations in experimental infective endocarditis, 1087

Hemodynamics

- Effects of sublingual nifedipine on hemodynamics and systolic and diastolic function in patients with hypertrophic cardiomyopathy, 1001
- Isometric exercise in patients with chronic advanced heart failure: hemodynamic and neurohumoral evaluation, 975
- Maintenance of exercise stroke volume during ventricular versus atrial synchronous pacing: rate of contractility, 1037

Heterogeneity

- Heterogeneity within observed regions: physiologic basis and effects on estimation of rates of biodynamic processes, IV-47

Histochemistry

- An enzyme histochemical study of human sinus node, coronary sinus, and mitral valve muscle, 205

Hydralazine

- Importance of internal controls, statistical methods, and side effects in short-term trials of vasodilators: a study of hydralazine kinetics in patients with aortic regurgitation, 865
- Treatment of canine permeability pulmonary edema: short-term effects of dobutamine, furosemide, and hydralazine, 1365

Hydraulic load

- Characteristics of vascular hydraulic load in patients with heart failure, 61

Hyperlipoproteinemia

- Atherogenic lipoproteins and coronary artery disease: concepts derived from recent advances in cellular and molecular biology, 943

Hypertension

- Comprehensive health care and noncardiovascular mortality: an unlikely explanation of the findings from the Hypertension Detection and Follow-up Program, 692

- Is hypertension more benign when associated with obesity? 53
- Participation of endogenous catecholamines in the regulation of left ventricular mass in progeny of hypertensive parents, 38
- Transient enhancement of sympathetic nervous system activity by long-term restriction of sodium intake, 47

Hypertrophic cardiomyopathy

- Verapamil-induced improvement in left ventricular diastolic filling and increased exercise tolerance in patients with hypertrophic cardiomyopathy: short- and long-term effects, 853

I

Immunofluorescence

- Local changes in myosin types in diseased human atrial myocardium: a quantitative immunofluorescence study, 272

Immunosuppression

- A prospective randomized trial of pretransfusion/azathioprine/prednisone versus cyclosporine/prednisone immunosuppression in cardiac transplant recipients: preliminary results, II-227

Internal mammary artery

- Does mammary artery grafting increase surgical risk? II-170

Intracoronary injection

- Factors that modify the flow response to intracoronary injections, 287

Ischemia

- The dependence of myocardial ultrasonic integrated backscatter on contractile performance, 183
- Effect of the combination of diltiazem and atenolol on exercise-induced regional myocardial ischemia in conscious dogs, 233
- Effect of serial brief ischemic episodes on extracellular K^+ , pH, and activation in the pig, 922
- Effects of right ventricular ischemia on left ventricular geometry and the end-diastolic pressure-volume relationship in the dog, 1104
- Effects of unilateral stellate ganglion stimulation and ablation on electrophysiologic changes induced by acute myocardial ischemia in dogs, 585
- Enhancement of recovery of myocardial function by oxygen free-radical scavengers after reversible regional ischemia, 915
- Fibrin formation and platelet aggregation in patients with severe coronary artery disease: relationship with the degree of myocardial ischemia, 27
- Immediate functional recovery and avoidance of reperfusion injury with surgical revascularization of short-term coronary occlusion, 431
- Intraoperative detection of myocardial ischemia in high-risk patients: electrocardiography vs two-dimensional transesophageal echocardiography, 1015
- Left ventricular systolic and diastolic function in coronary artery disease: effects of revascularization on exercise-induced ischemia, 119
- Mechanisms of improving regional and global ventricular function by preload alterations during acute ischemia in the canine left ventricle, 1125
- Stable angina as a manifestation of ischemic heart disease: medical management, V-145
- Ultrasonic tissue characterization: detection of acute myocardial ischemia in dogs, 193
- Use of an ultra short-acting β -blocker in patients with acute myocardial ischemia, 873

- Treatment of canine permeability pulmonary edema: short-term effects of dobutamine, furosemide, and hydralazine, 1365
- Pulmonary hypertension**
- The effect of low-dose intravenous nitroglycerin on pulmonary hypertension immediately after replacement of a stenotic mitral valve, II-164
- Pulmonary vascular disease**
- The pressure-flow response of the pulmonary circulation in patients with heart failure and pulmonary vascular disease, 1270

Pulsus paradoxus

- Effects of intravascular volume state on the value of pulsus paradoxus and right ventricular diastolic collapse in predicting cardiac tamponade, 1076

Q

QRS complex

- Quantitative analysis of the high-frequency components of the signal-averaged QRS complex in patients with acute myocardial infarction: a prospective study, 105

R

Race differences

- The ratio of plasma high-density lipoprotein cholesterol to total and low-density lipoprotein cholesterol: age-related changes and race and sex differences in selected North American populations. The Lipid Research Clinics Program Prevalence Study, 93

Radionuclide angiography

- Validation of attenuation-corrected equilibrium radionuclide angiographic determinations of right ventricular volume: comparison with cast-validated biplane cineventriculography, 317
- The value of the radionuclide angiogram in the prediction of perioperative myocardial infarction in patients undergoing lower extremity revascularization procedures, II-13

Radionuclide studies

- Radionuclide methods of identifying patients who may require coronary artery bypass surgery, V-9

Randomized trials

- Design and study similarities and contrasts: the Veterans Administration, European, and CASS randomized trials of coronary artery bypass graft surgery, V-110
- A perspective on the three large multicenter randomized clinical trials of coronary bypass surgery for chronic stable angina, V-123

Raynaud's phenomenon

- Effects of β -adrenoreceptor-blocking drugs in patients with Raynaud's phenomenon, 466

Reperfusion

- The effects of coronary angioplasty and reperfusion on distribution of myocardial flow, 334
- Effects of propranolol and diltiazem alone and in combination on the recovery of left ventricular segmental function after temporary coronary occlusion and long-term reperfusion in conscious dogs, 413
- Immediate functional recovery and avoidance of reperfusion injury with surgical revascularization of short-term coronary occlusion, 431
- Patterns of myoglobin release after reperfusion of injured myocardium, 639

Repolarization

- Change in ventricular cavity size: differential effects on QRS and T wave amplitude, 495
- Dispersion of ventricular repolarization and arrhythmia: study of two consecutive ventricular premature complexes, 370

Restenosis

- Influence of intimal dissection on restenosis after successful coronary angioplasty, 530

Revascularization

- Effect of early postoperative volume loading on left ventricular systolic function (including left ventricular ejection fraction determined by myocardial marker) after myocardial revascularization, II-207
- Left ventricular systolic and diastolic function in coronary artery disease: effects of revascularization on exercise-induced ischemia, 119
- The value of the radionuclide angiogram in the prediction of perioperative myocardial infarction in patients undergoing lower extremity revascularization procedures, II-13

Rheumatic fever

The virtual disappearance of rheumatic fever in the United States: lessons in the rise and fall of disease. T. Duckett Jones Memorial Lecture, 1155

Right heart assist

Right heart assist by intermittent abdominal compression after surgery for congenital heart disease, II-97

Right heart conduits

Long-term follow-up of patients with synthetic right heart conduits, II-77

Right ventricle

Decision making in the definitive repair of the heart with a small right ventricle, II-52

Risk factors

Coronary risk factor statement for the American public, 1135A
Risk factors for the development of prosthetic valve endocarditis, 31

S

Scintigraphy

Exercise thallium-201 scintigraphy in dogs: effects of long-term coronary occlusion and collateral development on early and late scintigraphic images, 881

Senning operation

Global and regional right ventricular function in normal infants and infants with transposition of the great arteries after Senning operation, 1008

Senning repair for transposition of the great arteries in the first week of life, 840

Serotonin

Cyclic blood flow variations induced by platelet-activating factor in stenosed canine coronary arteries despite inhibition of thromboxane synthetase, serotonin receptors, and α -adrenergic receptors, 397

Sex differences

The ratio of plasma high-density lipoprotein cholesterol to total and low-density lipoprotein cholesterol: age-related changes and race and sex differences in selected North American populations. The Lipid Research Clinics Program Prevalence Study, 93

Signal averaging

Abnormal signal-averaged electrocardiograms in patients with nonischemic congestive cardiomyopathy: relationship to sustained ventricular tachyarrhythmias, 1308

Quantitative analysis of the high-frequency components of the signal-averaged QRS complex in patients with acute myocardial infarction: a prospective study, 105

Sinus node

An enzyme histochemical study of human sinus node, coronary sinus, and mitral valve muscle, 205

Smoking

The relationship of white cell count, platelet count, and hematocrit to cigarette smoking in adolescents: the Oslo Youth Study, 971

Sodium

Transient enhancement of sympathetic nervous system activity by long-term restriction of sodium intake, 47

Sotalol

Electrophysiologic and antiarrhythmic effects of sotalol in patients with life-threatening ventricular tachyarrhythmias, 555

Special Report

Coronary risk factor statement for the American public, 1135A

Streptokinase

A comparison of the thrombolytic and hemorrhagic effects of tissue-type plasminogen activator and streptokinase in rabbits, 178

Coronary anatomy and left ventricular function in the first 12 hours of acute myocardial infarction: the Western Washington Randomized Intracoronary Streptokinase Trial, 292

The effects of the rate of intravenous infusion of streptokinase and the duration of symptoms on the time interval to reperfusion in patients with acute myocardial infarction, 1053

The hypotensive effect of intravenous streptokinase in patients with acute myocardial infarction, 1321

Patterns of myoglobin release after reperfusion of injured myocardium, 639

Stroke volume

Diminished stroke volume during inspiration: a reverse thoracic pump, 668

Substrate transport

A clinically applicable method for the estimation of substrate transport in the coronary circulation in vivo, IV-81

Sudden death

Programmed ventricular stimulation in survivors of an acute myocardial infarction, 487

Sudden unexpected death in patients with congestive heart failure: a second frontier, 681

Surgery

Abnormal distribution of pulmonary blood flow after the Glenn shunt or Fontan procedure: risk of development of arteriovenous fistulae, 471

Comparative long-term effects of coronary artery bypass graft surgery and percutaneous transluminal coronary angioplasty on regional coronary flow reserve, 833

Death and other time-related events after valve replacement, 753

Global and regional right ventricular function in normal infants and infants with transposition of the great arteries after Senning operation, 1008

In-hospital morbidity and mortality in patients undergoing elective coronary angioplasty, 1044

Reoperation for coronary artery disease, V-59

Senning repair for transposition of the great arteries in the first week of life, 840

Surgery in the treatment of coronary artery disease: introduction, V-1

Sympathetic afferents

Interruption of sympathetic and vagal-mediated afferent responses by transmural myocardial infarction, 623

Sympathetic nervous system

Effect of the sympathetic nervous system on limb circulation and metabolism during exercise in patients with heart failure, 72

Transient enhancement of sympathetic nervous system activity by long-term restriction of sodium intake, 47

T

Tachycardia

Autonomic control of ventricular tachycardia: sympathetic neural influence on spontaneous tachycardia 24 hours after coronary occlusion, 933

Comparative efficacy of transvenous cardioversion and pacing in patients with sustained ventricular tachycardia: a prospective, randomized, crossover study, 153

Computer detection of atrioventricular dissociation from surface electrocardiograms during wide QRS complex tachycardias, 1028

Intermittent failure of local conduction during ventricular tachycardia, 1286

Periodic procainamide for paroxysmal tachycardia, 147

Thallium

Exercise thallium-201 scintigraphy in dogs: effects of long-term coronary occlusion and collateral development on early and late scintigraphic images, 881

Thoracic pump

Diminished stroke volume during inspiration: a reverse thoracic pump, 668

Thrombolysis

A comparison of the thrombolytic and hemorrhagic effects of tissue-type plasminogen activator and streptokinase in rabbits, 178

Coronary thrombolysis in dogs with intravenously administered human pro-urokinase, 384

The effects of the rate of intravenous infusion of streptokinase and the duration of symptoms on the time interval to reperfusion in patients with acute myocardial infarction, 1053

Human tissue-type plasminogen activator: from the laboratory to the bedside, 18

The hypotensive effect of intravenous streptokinase in patients with acute myocardial infarction, 1321

- Lysis of left ventricular thrombi with urokinase, 112
 Prevention of coronary thrombosis with subthrombolytic doses of tissue-type plasminogen activator, 1346
 Usefulness of coronary artery bypass graft surgery or percutaneous transluminal angioplasty after thrombolytic therapy, V-39
- Thromboxane**
 Cyclic blood flow variations induced by platelet-activating factor in stenosed canine coronary arteries despite inhibition of thromboxane synthetase, serotonin receptors, and α -adrenergic receptors, 397
- Thrombus**
 Lysis of left ventricular thrombi with urokinase, 112
- Tissue characterization**
 Angle dependence of ultrasonic backscatter in arterial tissues: a study in vitro, 572
 Ultrasonic tissue characterization: detection of acute myocardial ischemia in dogs, 193
- Tissue-type plasminogen activator**
 A comparison of the thrombolytic and hemorrhagic effects of tissue-type plasminogen activator and streptokinase in rabbits, 178
 Human tissue-type plasminogen activator: from the laboratory to the bedside, 18
 Prevention of coronary thrombosis with subthrombolytic doses of tissue-type plasminogen activator, 1346
- Transcatheter ablation**
 Efficacy and safety of transcatheter ablation of posteroseptal accessory pathways, 170
- Transposition of the great arteries**
 Global and regional right ventricular function in normal infants and infants with transposition of the great arteries after Senning operation, 1008
 Improved right ventricular function after intra-atrial repair of transposition of the great arteries, II-45
 Senning repair for transposition of the great arteries in the first week of life, 840
- Tricuspid atresia**
 Abnormal distribution of pulmonary blood flow after the Glenn shunt or Fontan procedure: risk of development of arteriovenous fistulae, 471
 Outcome of the Fontan procedure in patients with tricuspid atresia, II-88
- Triggered activity**
 Cesium chloride-induced long QT syndrome: demonstration of afterdepolarizations and triggered activity in vivo, 1092
- U**
- Ultrasonic backscatter**
 Angle dependence of ultrasonic backscatter in arterial tissues: a study in vitro, 572
 The dependence of myocardial ultrasonic integrated backscatter on contractile performance, 183
- Ultrasound**
 The accuracy of Doppler ultrasound measurement of pressure gradients across irregular, dual, and tunnel-like obstructions to blood flow, 577
 Ultrasonic tissue characterization: detection of acute myocardial ischemia in dogs, 193
- University-industry collaboration**
 Academia-industry collaborative research programs—a legal perspective, I-41
 Academia-industry dialogue: a step toward mutual understanding, I-53
 Academic-industrial relations in the United Kingdom, I-51
 Cardiovascular medicine: opportunities for enhanced university-industry collaboration. Introduction, I-1
 The changing climate for cardiovascular research: stresses and opportunities, I-36
 Educating physicians in the use of pharmaceuticals, I-31
 Industry and academia in collaboration: the Pfizer experience, I-13
 Institutional review boards and collaborations between academia and industry: some counterproductive policies and practices, I-48

- The pharmaceutical industry and academic medicine in collaboration, I-3
 The pharmaceutical industry and academic medicine: opportunities for physician collaboration, I-21
 Policy directions for the National Heart, Lung, and Blood Institute: implications for academia and industry, I-44
 Principles of partnership in research, I-18
 Shared responsibility in clinical research, I-25
 A university administrator's view of academia-industry collaboration, I-8
- Urokinase**
 Lysis of left ventricular thrombi with urokinase, 112

V

- Vagal afferents**
 Interruption of sympathetic and vagal-mediated afferent responses by transmural myocardial infarction, 623
- Valve replacement**
 Clinical correlates of atrial tachyarrhythmias after valve replacement for aortic stenosis, II-159
 Comparative evaluation of aortic valve replacement with Starr, Björk, and porcine valve prostheses, II-140
 Death and other time-related events after valve replacement, 753
 The effect of low-dose intravenous nitroglycerin on pulmonary hypertension immediately after replacement of a stenotic mitral valve, II-164
 Hemodynamic performance of the Carpentier-Edwards pericardial valve in the aortic position in vivo, II-146
 Morbidity and mortality in mitral valve surgery, II-120
 Operative risk of mitral valve replacement: discriminant analysis of 1329 procedures, II-108
 Results of triple valve replacement in 91 patients: perioperative mortality and long-term follow-up, 130
 Survival and functional results after valve replacement for aortic regurgitation from 1976 to 1983: impact of preoperative left ventricular function, 1244
- Valved conduits**
 Replacement of obstructed right ventricular-pulmonary arterial valved conduits with nonvalved conduits in children, II-84
- Valvular heart disease**
 Assessment and follow-up of patients with aortic regurgitation by an updated Doppler echocardiographic measurement of the regurgitant fraction in the aortic arch, 819
 A Doppler-two-dimensional echocardiographic method for quantitation of mitral regurgitation, 377
 Morbidity and mortality in mitral valve surgery, II-120
 A new approach to noninvasive evaluation of aortic regurgitant fraction by two-dimensional Doppler echocardiography, 523
 Noninvasive estimation of valve area in patients with aortic stenosis by Doppler ultrasound and two-dimensional echocardiography, 810
 Operative risk of mitral valve replacement: discriminant analysis of 1329 procedures, II-108
 Results of triple valve replacement in 91 patients: perioperative mortality and long-term follow-up, 130
- Vasodilation or reserve**
 Transluminal, subseal measurement of coronary artery blood flow velocity and vasodilator reserve in man, 82
- Vasodilators**
 Importance of internal controls, statistical methods, and side effects in short-term trials of vasodilators: a study of hydralazine kinetics in patients with aortic regurgitation, 865
- Vasoreactivity**
 Increased lung vasoreactivity in children from Leadville, Colorado, after recovery from high-altitude pulmonary edema, 957
- Vasospasm**
 The effect of cyclooxygenase inhibition on vasomotion of proximal coronary arteries with endothelial damage, 389

SUBJECT INDEX

Vein graft disease

Aortoocoronary artery vein-graft disease: experimental and clinical approach for the understanding of the role of platelets and platelet inhibitors, V-65

Ventricular assist devices

Long-term follow-up of postcardiotomy patients with profound cardiogenic shock treated with ventricular assist devices, II-216

Ventricular fibrillation

Effect of serial brief ischemic episodes on extracellular K^+ , pH, and activation in the pig, 922

Ventricular function

Altered left ventricular mechanics in patients with valvular aortic stenosis and coarctation of the aorta: effects on systolic performance and late outcome, 515

Are right and left ventricular ejection fractions equal? Ejection fractions in normal subjects and in patients with first acute myocardial infarction, 502

Coronary anatomy and left ventricular function in the first 12 hours of acute myocardial infarction: the Western Washington Randomized Intracoronary Streptokinase Trial, 292

Effect of early postoperative volume loading on left ventricular systolic function (including left ventricular ejection fraction determined by myocardial marker) after myocardial revascularization, II-207

Effects of propranolol and diltiazem alone and in combination on the recovery of left ventricular segmental function after temporary coronary occlusion and long-term reperfusion in conscious dogs, 413

Effects of reduced left ventricular mass on chamber architecture, load, and function: a study of anorexia nervosa, 991

Effects of right ventricular ischemia on left ventricular geometry and the end-diastolic pressure-volume relationship in the dog, 1104

Emergency bypass surgery: late effects on size of infarction and ventricular function, II-179

Global and regional right ventricular function in normal infants and infants with transposition of the great arteries after Senning operation, 1008

Immediate functional recovery and avoidance of reperfusion injury with surgical revascularization of short-term coronary occlusion, 431

Improved right ventricular function after intra-atrial repair of transposition of the great arteries, II-45

Improvement in regional wall motion and left ventricular relaxation after administration of diltiazem in patients with coronary artery disease, 353

Left ventricular ejection fraction after acute coronary occlusion in conscious dogs: relation to the extent and site of myocardial infarction, 632

Maintenance of exercise stroke volume during ventricular versus atrial synchronous pacing: rate of contractility, 1037

Mechanisms of improving regional and global ventricular function by preload alterations during acute ischemia in the canine left ventricle, 1125

A potential method of correcting intracavitary left ventricular filling pressures for the effects of positive end-expiratory airway pressure, 660

Right ventricular function in an operating room model of mechanical

[Vein graft disease-Wolff-Parkinson-White syndrome]

left ventricular assistance and its effects in patients with depressed left ventricular function, 1279

The superiority of maximum fiber elastance over maximum stress-volume ratio as an index of contractile state, 648

Survival and functional results after valve replacement for aortic regurgitation from 1976 to 1983: impact of preoperative left ventricular function, 1244

Ventricular hypertrophy

Diastolic abnormalities in patients with hypertrophic cardiomyopathy: relation to magnitude of left ventricular hypertrophy, 310

Participation of endogenous catecholamines in the regulation of left ventricular mass in progeny of hypertensive parents, 38

Ventricular septal rupture

Urgent surgery for ventricular septal rupture complicating acute myocardial infarction, II-185

Ventricular size

Change in ventricular cavity size: differential effects on QRS and T wave amplitude, 495

Ventricular thrombi

Prognostic significance and natural history of left ventricular thrombi in patients with acute anterior myocardial infarction: a two-dimensional echocardiographic study, 774

Ventricular volume

Accuracy of volume measurement by conductance catheter in isolated, ejecting canine hearts, 440

Validation of attenuation-corrected equilibrium radionuclide angiographic determinations of right ventricular volume: comparison with cast-validated biplane cineventriculography, 317

Verapamil

Frequency-dependent effects of verapamil on atrioventricular nodal conduction in man, 344

The interaction of verapamil and norverapamil with β -adrenergic receptors, 547

Verapamil-induced improvement in left ventricular diastolic filling and increased exercise tolerance in patients with hypertrophic cardiomyopathy: short- and long-term effects, 853

Volume loading

Effect of early postoperative volume loading on left ventricular systolic function (including left ventricular ejection fraction determined by myocardial marker) after myocardial revascularization, II-207

W

Warfarin

Warfarin versus dipyridamole-aspirin and pentoxifylline-aspirin for the prevention of prosthetic heart valve thromboembolism: a prospective randomized clinical trial, 1059

Wolff-Parkinson-White syndrome

Atrial fibrillation in patients with Wolff-Parkinson-White syndrome: incidence after surgical ablation of the accessory pathway, 161

Efficacy and safety of transcatheter ablation of posteroseptal accessory pathways, 170
